

**REMARKS****I. Status of the Claims**

Claims 37-69 are currently pending. Claims 37-56 have been allowed.

By this Amendment, claims 61-69 have been canceled without prejudice or disclaimer. Claims 70-78 have been newly added. No new matter has been introduced by this Amendment. Entry and consideration of this Amendment are respectfully requested. Upon entry of this Amendment, claims 37-56 and 70-78 would be pending.

**II. Rejections under 35 U.S.C. §102**

Claims 61-69 have been rejected under 35 U.S.C. §102(b) as being anticipated by Griesmer et al (U.S. Patent No. 5,379,335).

Claims 61-69 have been canceled without prejudice or disclaimer rendering the rejection of these claims moot.

Newly added claims 70-78 are believed to be distinguishable over the cited reference.

In an image sensing unit having a plurality of image sensing elements, a timing when a driving condition of the image sensing unit is changed is important. Further, it is important to adjust a timing when the driving condition of the image sensing unit is changed, a timing when the irradiation is started, and a timing when a grid is driven.

On the contrary, Griesmer discloses timings when an irradiation is started and a grid is driven. However, Griesmer does not disclose or suggest that a timing when the driving condition of the image sensing unit is changed, a timing when the irradiation is started, and a

timing when a grid is driven are controlled so as to have a relationship, as reflected in the newly added claims.

**CONCLUSION**

Based on the foregoing amendments and remarks, Applicant respectfully requests reconsideration and withdrawal of the rejection of claims and allowance of this application.
